EDUCATION

Sapthagiri NPS University — *B.Tech in Computer Science and Engineering (AI & ML)* 2024 – Present (Class of 2028)

Bengaluru, India

- **Jaihind Pre-University College:** 12th Grade (89%) — 2024
- **New Indian Public School:** 10th Grade (95%) — 2022

TECHNICAL SKILLS

Languages:	Python (Proficient), C, C++, Java, JavaScript/TypeScript, SQL
AI/ML & Frameworks:	PyTorch, FastAPI, Next.js (App Router), Streamlit, OpenCV, Hugging Face Transformers, Tesseract OCR, Grad-CAM, RAG, Web Audio API
Cloud & DevOps:	Amazon Web Services (AWS), Docker, Docker Compose, Git, GitHub, Hugging Face Spaces, Cloudflare Workers, Vercel, Oracle Cloud Infrastructure (OCI)
Security & Databases:	SQLite (WAL Mode), JWT Authentication, Ethical Hacking, Web Security

SOFT SKILLS

Core Competencies: Problem Solving, Technical Leadership, Adaptability, Team Collaboration, Strategic Communication, Analytical Thinking, Continuous Learning

EXPERIENCE

Amazon Web Services (AWS) — *AWS Student Builder Campus Leader (Internship)* 2026

- Led peer-to-peer developer outreach and technical campaigns on campus, driving student awareness and AWS Builder ID adoption.
- Authored and published technical articles on cloud computing workflows and hands-on AWS Builder Center usage.
- Organized and executed technical workshops, tabling events, and class presentations to onboard 300+ student developers onto AWS cloud services.
- Managed end-to-end event logistics, outreach metrics, and weekly activity reporting to measure campus community growth and engagement.

Rinex (Partnered with Hipla) — *Cyber Security Intern (Ethical Hacking)* 2024

- Conducted hands-on vulnerability assessments and security analysis across web applications and network topologies.

Deloitte Australia (Forage) — *Cyber Security Job Simulation* 2024

- Performed cloud security investigations, analyzed forensic log data, and produced security risk mitigation summaries.

PROJECTS

AeroScan — End-to-End Pneumonia Detection System

- Trained a custom **PyTorch ResNet18** transfer learning model for chest X-ray classification, integrating **Grad-CAM** heatmaps for diagnostic verification.
- Built a **FastAPI** inference microservice containerized with **Docker** and deployed to **Hugging Face Spaces**.
- Developed a responsive **Next.js 16** web dashboard deployed on **Cloudflare Workers** featuring **Framer Motion** animations and low-latency inference pipelines.

MedVibe — AI Omnichannel ER Triage Terminal

- Engineered an offline-resilient ER triage engine using **FastAPI** and **SQLite (WAL mode)** with auto-sync queues during network drops.
- Integrated **Gemini 1.5-Flash** across 3 touchpoints (Nurse Terminal, Patient Kiosk, Mobile QR Portal) for acuity classification and live updates.
- Designed a high-contrast Neo-Brutalist UI with custom CSS animations, **Chart.js** metrics, **jsPDF** report generation, and **JWT** security protocols.

MockIQ — Real-Time AI Interview Evaluator

- Developed a 100% local, privacy-first interview coaching platform using **Streamlit**, integrating **Qwen LLM** to dynamically generate questions and evaluate STAR-framework responses.
- Built a multi-modal analysis pipeline combining **OpenAI Whisper** for transcription, **DeepFace/OpenCV** for body language tracking, and **spaCy** for grammar profiling without external cloud dependencies.

Cyber-Clay PDF Toolkit

- Built a full-stack PDF processing suite with **Next.js (App Router)** featuring 20+ operations including document manipulation and AI OCR extraction using **Tesseract.js**.
- Engineered a hybrid execution engine blending client-side JS processing with server-side binaries (**QPDF**, **Ghostscript**, **Puppeteer**) for heavy compression, repair, and rendering.

PULSE — Premium Audio Experience

- Engineered a web audio player using **Vanilla JS** and a **FastAPI** REST backend, delivering responsive playback with sub-second API latency.
- Built a real-time **HTML5 Canvas API** audio visualizer with custom Web Audio API node pipelines to analyze frequency spectrums.

Finance Management System *(Python)*

- Built a desktop application to track daily personal expense metrics, implement user budget limits, and generate visual data analytics on spending habits.

Attendance Manager *(C/C++)*

- Designed an automated student attendance tracking system leveraging low-level file handling for persistent data storage and report generation.

API-Integrated Intelligent Chatbot *(Java)*

- Developed a conversational chatbot in Java integrated with external REST APIs to fetch and render dynamic real-time data for user queries.

CERTIFICATIONS & ACHIEVEMENTS

- **Oracle Certified Foundations Associate:** Oracle Cloud Infrastructure AI (2025)
- **AWS Student Builder Campus Leader** (2026)
- **Cisco Networking Academy:** Introduction to Cybersecurity (2024)
- **CodeSphere Global Codeathon Participant:** Phase Shift at BMSCE (2025)
